electriccarconverts We spent our Saturday at the London to Brighton Electric Vehicle Rally. We started at parliament square (next to Big Ben) and drove Meryl, the electric Defender all the way to Brighton beach, our hometown!

We covered a total of 75 miles and finished with 10% charge remaining- not bad for a 26.5kWh battery pack in a 2500kg vehicle!! (Especially with the stop start driving in London and the very steep hills coming into Sussex!)

We were joined by over 60 other electric vehicles, ranging

serv_sl

serv_sl This weekend, SERV S&L took part in the @thebiglem0n @london2brightonevally. We've been running 'Bolt' our Zero Motorcycles SR/S for a while now and have saved approximately 1000kgs of CO2 and £700 in fuel costs. On Saturday, 'Bolt' was joined by our newest fleet addition and second electric motorbike, 'Simon.' The two of them were keen to show their green credentials, and educate the motor biking public about the future of motorcycling (spoiler alert: its looking good! 🤩🏍️⚡)

With stops at @iccp performing arts for breakfast and a photo opportunity, a spirited run through the countryside, a quick interview with @bbcradiosussex on Brighton seafront and then onto our display stand with @onthewheelsuperstore the day was an amazing success. As it came to a close, we enjoyed food and entertainment whilst the bikes took a quick charge at @uniofbrighton. Then it was a final run back up the A23/ M23 to London. 🌞🏠🎵

These bikes won't be right for all Bloodbike groups, but for SERV S&L, they're a perfect addition to our fleet. Yesterday's trip cost £1.50 per bike in charging, we get approximately 200 mile range in town with the Re-Gen and we're helping the Mayor of London, Sadiq Khan's aim to lower pollution levels whilst carrying out our mission. 🌱🔋🌍

Fleet Data Insight through TDS Ultra
6d · Imo

London to Brighton is Ultra Charged by **TDS Ultra** this weekend

This weekend the **TDS Ultra** team will be at Madeira drive Brighton as the data partner for the **London to Brighton EV Rally**.

It is a perfect fit for us at **TDS Ultra** because using data to change behaviour and move to lower carbon solutions is what we do day in day out for our clients. The event is also on our doorstep as a growing Sussex based business so it makes total sense to be involved.

Drivers are also using our vehicle check solution **Ultra Check** to carryout a walk round safety check of their vehicle before starting the rally.

Our team of experts will be gathering and analysing data from a whole host of electric powered vehicles in the rally including airplanes, bicycles, vans, cars, trucks and self builds. Not only will we be tracking the fastest but also the most efficient movement of passengers and vehicle weights from London to Brighton.

A big thanks to **Bill Chambers** from the **TDS Ultra** team in making this happen. We look forward to seeing the results. Next year London to Paris? With the innovations in EV moving ever faster it is well within reach!

If you think **TDS Ultra** can help your business with moving your fleet of vehicles to EV or carrying out walkaround checks electronically get in touch.
